PROFESSIONAL SUMMARY

Software Engineering and Game Development graduate of SMK Wikrama Bogor with 6 months of internship experience as a Mobile Developer using Flutter and Dart. Hands on experience includes developing mobile application features, integrating REST APIs, and writing technical documentation. Entry-level QA skills include functional testing, REST API testing with Postman, data validation, and reporting bug findings to development teams. Seeking to build a career in Quality Assurance, focusing on functional software testing and contributing to high-quality mobile and web applications.

EXPERIENCE

PT. Berdhaya Gemilang Mandiri | Mobile Developer Intern **January 2025 – June 2025**

- Developed and tested the user interface (UI) and feature functionality of Flutter based mobile applications, ensuring each feature conformed to the projects requirement specifications.
- Verified REST API integration using Postman by analyzing requests, responses, and data consistency between the mobile application and the server to confirm that data was exchanged correctly.
- Identified functional issues and UI inconsistencies in the application and reported them promptly for follow-up, helping to maintain overall system stability.
- Prepared technical documentation covering project setup, configuration, repository structure, and troubleshooting steps to support team understanding and project maintenance.

EDUCATION

SMKS WIKRAMA BOGOR **July 2023 – June 2026**

- Software Engineering and Game Development | Final Score: 82.45 / 100

PROJECTS

YANTEK Mobile | Vehicle Management System

- Performed manual testing across 10 main user flows to verify vehicle data entry and ensure recorded information was accurate.
- Checked application functionality under different usage conditions and identified issues that could affect data accuracy or expected application behavior.
- Developed a vehicle data input feature using Flutter, allowing users to record and manage vehicle information digitally through the application.

WCP Mobile | Workforce Management Platform

- Tested the attendance feature using 13 user accounts across mobile and web platforms, checking clock-in and clock-out functionality and reporting identified issues to the senior team.
- Validated attendance data and checked boundary conditions to identify potential issues affecting the accuracy of attendance records.
- Designed a responsive Flutter-based interface for the attendance page, allowing users to perform clock-in and clock-out within the WCP Mobile application.

SKILLS

Testing & Quality Assurance: Manual Testing, Functional Testing, API Testing (Postman), SDLC (Basic), Data Validation.

Tools & Software: Postman, Git/GitHub, GitLab, Trello, Notion, Microsoft Office (Word, Excel, PowerPoint), Google Workspace.

Technical & Web Skills: Flutter, REST API, HTML/CSS, PHP, MySQL, Laravel, WordPress.

Soft Skills & Languages: Teamwork, Communication, Adaptability, Time Management | Indonesian (Native), English (Basic Proficiency)

CERTIFICATIONS & TRAINING

Junior Programmer (Junior Coder) | BNSP (2026)

Programming Logic 101 | Dicoding Indonesia (2026)

JobReady Employability Skills (Bahasa) | Wadhwani Foundation (2026)

Learn Basic JavaScript | Dicoding Indonesia (2026)

Learn AI Basics | Dicoding Indonesia (2026)
